Final Report**SEROLOGY RESULTS****Mycobacterium paratuberculosis ELISA**

<u>ANIMAL ID</u>	<u>REF CASE NO</u>	<u>SPECIMEN ID</u>	<u>SPECIMEN CODE</u>	<u>JOHNE'S ELISA</u>	<u>JOHNE'S INTERP</u>
840003241353930	TANSY	M24-12505-1-1	SERUM	0.118	NEGATIVE
840003250727270	FLOWER	M24-12505-2-1	SERUM	0.118	NEGATIVE
840003207873848	LUNA	M24-12505-3-1	SERUM	0.350	NEGATIVE
840003250727286	STELLA	M24-12505-4-1	SERUM	0.289	NEGATIVE
35EFX7383	GUNNER	M24-12505-5-1	SERUM	0.2	NEGATIVE
35EFG7186	ZEUS	M24-12505-6-1	SERUM	0.214	NEGATIVE

For serum and plasma, results are reported as S/P ratios (adjusted sample divided by adjusted positive control) per VMRD recommendations and WVDL validation. This assay is validated for caprine, ovine and bovine species. Other species are acceptable but have not been fully validated on this ELISA assay.:

Bovine serum and plasma samples with S/P ratio of:

- Less than 0.295 are classified as negative for Mycobacterium paratuberculosis antibodies
- Greater than or equal to 0.295, but less than 0.395 are classified as suspect
- Greater than or equal to 0.395 are classified as positive for Mycobacterium paratuberculosis antibodies

Bovine *milk* samples with S/P ratio of:

- Less than 0.125 are classified as negative for Mycobacterium paratuberculosis antibodies
- Greater than or equal to 0.125 are classified as positive for Mycobacterium paratuberculosis antibodies

Caprine/Ovine serum samples with S/P ratio of:

- Less than 0.795 are classified as negative for Mycobacterium paratuberculosis antibodies
- Greater than or equal to 0.795 are classified as positive for Mycobacterium paratuberculosis antibodies
